GROUP PROJECT PROPOSAL

TITLE: Fake News Detection

ABSTRACT

The main purpose of this system will be detecting Fake News over Original or legitimate news. The system will be fed with all kinds of news or without filter, out of which the system will detect the false or fake news and generate the result.

PROBLEM STATEMENT.
- Lack of trust in the news has been creating big issues in our society as we hardly get any trusted news.
- Fake news has been only used to make some capital by media.

OBJECTIVES
- To find fake or false news over truth or legit news.
- To help users get the correct information only.
- To reduce the fraud activities via news.
